

LES QUENNEVAIS SCHOOL

TRANSITION

HOLIDAY TASK BOOKLET

OUR ISLAND HOME

Learning to be your best - through excellence and enjoyment

THE SUMMER TASK

Each year, we have an amazing exhibition of your work inspired by the lessons we teach you during the transition days. Alongside the lessons you will have had, there are extra lessons and ideas for you to explore on our school website. You should choose one area you found most interesting during your transition days or you could choose an online activity if you are passionate about a particular subject such as computing or drama. If you need any help over the Summer or just want to check in, you can email me at p.jones@lesq.org.

ENGLISH

EXTRA ONLINE SUPPORT

If you were inspired by your English lesson on story telling techniques and feel super energised by those magical sentence types, why not write your own folk tale? You could illustrate it or even create a recording of it for us to listen to. Imagine telling your story in the dark with just a torch lighting up your face. I am getting scared just thinking about it! There are more lessons on the school website if you want to explore this further.

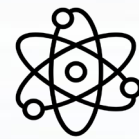

MATHS

EXTRA ONLINE SUPPORT

Who knew maths was going to be such fun?! If you were inspired by the artistic maths lessons, then why not take it further? Create your own mathematical models and present them to us next term. You could take some photos of your models at different places around Jersey or even make origami out of pictures of Jersey you have printed. How cool would that be? More lessons on the website if you're interested.

SCIENCE

Following your analysis of our school wildlife zone, why not look at the biodiversity of your own back garden? Or a rockpool? A park or anywhere where living things are! Present the different living things you find and comment on the biodiversity. You can present your investigation as a model, written report or a drawing, sketch and/or map.

ART

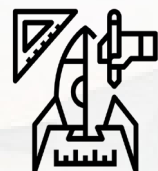

EXTRA ONLINE SUPPORT

So you had fun creating your own rockpool collage? Have a look at our on-line lessons to explore how artists see the sea. Try out our lessons on Photography, Textiles and Art. Go ahead and explore one or more of these areas to create your own response to the magical sea that surrounds our island.

DESIGN TECHNOLOGY

EXTRA ONLINE SUPPORT

I am sure you loved your rocket car making in DT. Build your own sand racer? Yes please!! Unleash your inner Jedi just like our very own Mr Ferguson. Explore different designs, modify your plans, create a graph of your times and speeds. Present your findings as a video blog. How brilliant is this??

DRAMA

EXTRA ONLINE SUPPORT

Inspired by the amazing, evocative stories you've been told? Want to create your own atmospheric recording of a famous Jersey tale? Well this is your chance. Create a video of your story telling prowess filled to the brim with tension, excitement and energy!

FOOD

ONLINE ONLY

So you think you're a good cook eh? Well now is your chance to dazzle with your masterchef skills. Create a dish or an entire menu inspired by local or foraged produce. Make a menu card and a step-by-step photo guide of your recipes. Are you the next Gordon Ramsay? We want to know!

MUSIC

ONLINE ONLY

Create your own piece of music or soundscape using the natural sounds from our shoreline. Get out and about, record some sounds on your phone or device. Using GarageBand on iPhone/iPad (or an online program such as Soundtrap) you can layer them up to create a unique piece of music. You could even add your own voice to create a song or podcast!

COMPUTING

ONLINE ONLY

Never forget that geeks shall inherit the earth. On that note, if you are a scratch wizzard and have learnt loads from Mr Galan's help videos, you can create your own game based on an aspect of Island life. Could you save the swimmers from the jelly fish at St Ouen or plough a field of royals from your expert coding?

GEOGRAPHY

EXTRA ONLINE SUPPORT

Are you angry about the problems with plastics following your geography lessons? You should be! This is your chance to get all that anger out! Create an informative and creative piece of protest art which explores the impact of plastics on the environment. Have a look at some of the amazing work created in the video if you need inspiration.

HISTORY

EXTRA ONLINE SUPPORT

Were you inspired by those brilliant historical explorations of Jersey sites of interest? I certainly was. Fancy yourself as a TV presenter? Why not make a video exploring a site of interest near you? What about creating a detailed exploration of your site visit? Could you teach something back to the history department? I bet you could!

RELIGIOUS STUDIES

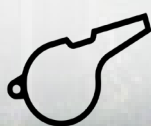

ONLINE ONLY

Want to find out more about our island home? Our island churches are a great place to start! They are steeped in amazing architecture, religious art and historical tales about Jersey's past. Carry out a site visit to your very own parish church to discover more. You could make a video exploring the history or importance of your local church? Why not create a 3D labelled model of your chosen church showing the key architectural features? Or even some beautiful photography or artwork exploring the stained-glass windows? Any element of your chosen church that has captured your imagination is fine by us! And any creative way you would like to present your findings is welcome!

PHYSICAL EDUCATION

ONLINE ONLY

Are you a sports nut? Could you create your own tasks for us to try inspired by the lessons you've been given? Could you create a research project on famous Jersey sportsmen and women? There are lots of ways in which you could share your passion for sports with us.

WHAT NEXT?

Well, that's kind of up to you. I would recommend you watch the video on the school website to help you get some ideas of what you might want to do and look at the amazing standard created by previous students. You need to complete one extended task. There are extra lessons you can look at to help you develop your in school work further or you can look at lessons which were not covered in the two transition days you had with us. You can combine tasks together. For example, you could combine English and Drama- create an atmospheric reading of your own amazing story or you could do two or more of the options if you like. Creating one really thoughtful, beautifully presented piece of work is often best though. You can go off on a tangent too. As long as you're inspired by the lessons to go off and think about how you want to explore our island home, that's good enough for us. Your work will tell us a story about you as much as about our island home so make sure you show us how passionate you are about being your best. Make sure it's excellent and make sure you enjoy doing it!

We are always amazed by the wonderful work Year 6 produce when they come to us in Year 7 and we cannot wait to hold a magnificent exhibition of your wonderful creations in September.

Remember, you can contact me over July and August if you want some advice or help with anything. Just email me.
